Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

OFFICE ACTION

Remarks

1. The response filed 27 NOV 2002 is improper due to word processing errors. The amendment is replete with words having improper spacing which will result in serious printing problems at issue. For example, on page 1 of the amendment, last line, note the space between "c" and "o" in "c onnected". Page 2, line 17, note the space between "a" and "b" in "a bility". Note the apparent spaces between the numerals of many reference characters. The substitute abstract is replete with such errors. The entire amendment must be reviewed and replacement sections with proper spacing be provided for the amendments made in the last response.

Election/Restriction

2. Upon reconsideration of the amended application, the following restriction requirement is considered proper at this stage of the prosecution pursuant to MPEP 811.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-20 and 25-30, drawn to an assembly, classified in class 366, subclass 331.
 - II. Claims 21-22, drawn to a method, classified in class 366, subclass 348.

Art Unit: 1723

4. The inventions are distinct from each other because of the following reasons:

5. Inventions II and I are related as process and apparatus. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as by an apparatus lacking bearings that surround the shaft.

6. Upon the election of Group I drawn to the assembly, the following election of species requirement will further apply:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: the claimed assembly; and

Species B: the claimed assembly in cartridge form.

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 11, and 25 appear to be generic to each of the species. Claims 10, 20, and new claims 28-30 are considered to read on Species B.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1723

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because the search required for Group is a divergent search, restriction for examination purposes as indicated is proper.

9. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1723

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
